# SOFTWARE QUALITY ASSURANCE (SUMMER 2021)

Submitted To: Prof. Chun Wang

#### Presentation on **NURSE SAFEGUARD**

Presented by:

Navneet Kaur Sukesh Gandham Kartik Ghagre Himanshu Patel

#### **Purpose:**

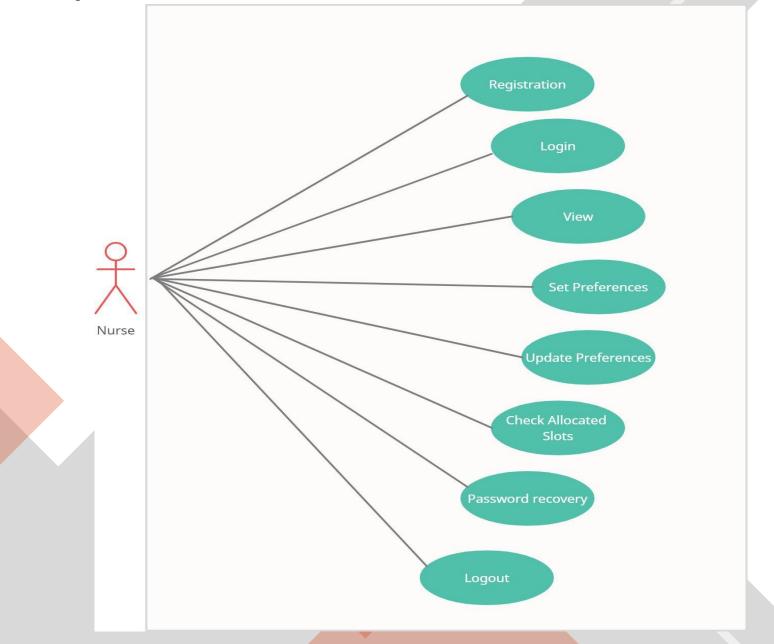

- The objective of the project is to develop the nurse scheduling system for 500 nurses of an agency in Montreal by June 2021.
- This schedule helps to accommodate supplemental nurses to different hospitals as per nurse's availability and preferences which matches the hospital requirements.

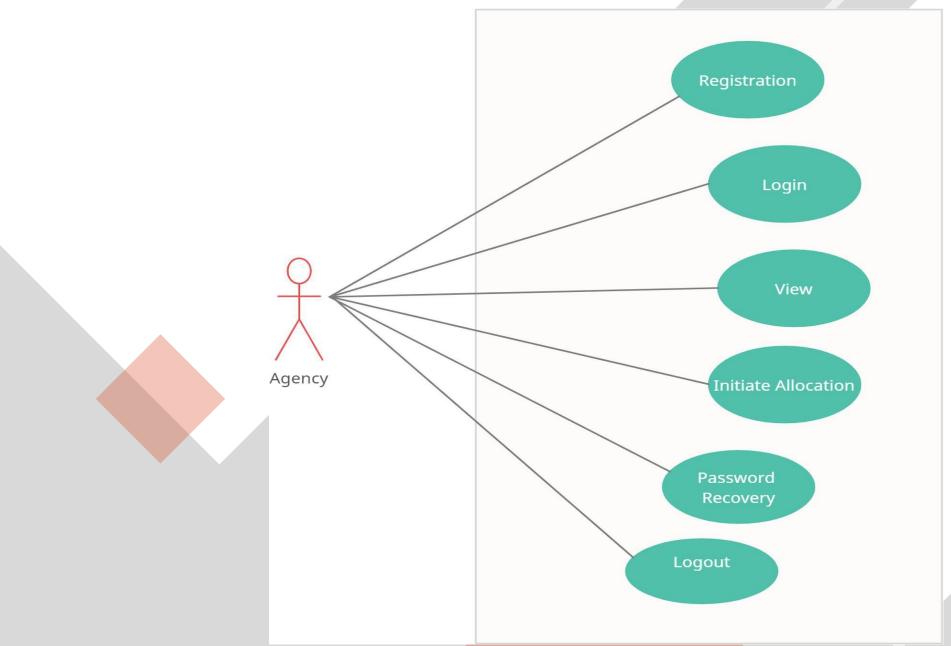

#### Software development process: Waterfall Model - Development Plan

Steps	Who is Involved	Action
Planning	Project Team	<ul> <li>Software Project Development plan (SPD plan)</li> <li>Software Quality Assurance plan (SQA plan)</li> </ul>
Analysis	Client Developer and QA team.	<ul> <li>Identify the customer's specifications.</li> <li>Software Requirement Specification (SRS) is developed.</li> </ul>
Design	Developer and QA team	Detailed design plan and process - Software Design Document
Development	Developer	<ul><li>Coding</li><li>Testing</li></ul>
Testing	QA team	<ul> <li>Test Case Preparation</li> <li>Testing which includes Integration Testing, Functional testing &amp; Regression testing</li> <li>SQA Report</li> </ul>
Deployment	Developer and QA team	Software Implementation

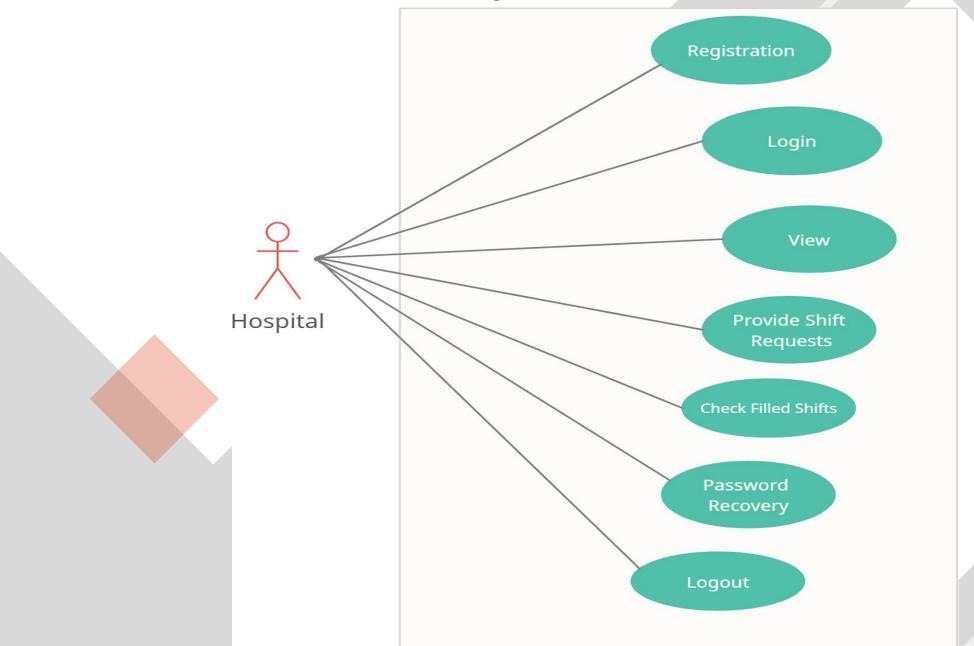

#### **Functional Requirements: Nurse**

#### **Functional Requirements: Agency**

## Functional Requirements: Hospital

#### **SQA Activities Plan**

SQA ACTIVITIES I				
Software Development Life Cycle	SQA Activities	Action Plan	Resources Involved	Output
Planning	Review of Development Plan	Formal Technical Review(FTR)	Review Team	-Meeting Minutes -Review Report in SQA report
	Evaluation of Development Plan	Audit using Checklist	Team Member	-Audit Report -Approved Version of Development Plan
	Review of SQA Plan	Formal Technical Review(FTR)	Review Team	-SQA planning report -SQA review minute -Approved Version of SQA Plan
Modeling	Review of requirement Specification	Formal Technical Review	Review Team	-Meeting Minutes -Review Report in SQA report -Approved Version of Requirement Specifications
	Review of Design Document	Peer Review/Informal Review	Internal Team	-Meeting Minutes
		Formal Technical Review	Review Team	-Review Report in SQA report -Approved Version of Design Document
	Evaluate Design Document	Audit	Internal Team	-Audit Report in SQA Report
Construction	Review of Test Case	Peer Review/Informal Review	Internal Team	-Final Draft of Test case Document
	Document	Formal Technical Review	Review Team	-Meeting Minutes -Review Report -Approved Test Case Document
	Testing before release	Unit Testing	Developer/Tester	-Unit Testing Report
	Testing	Functional Testing	Testers	-Test Summary Report

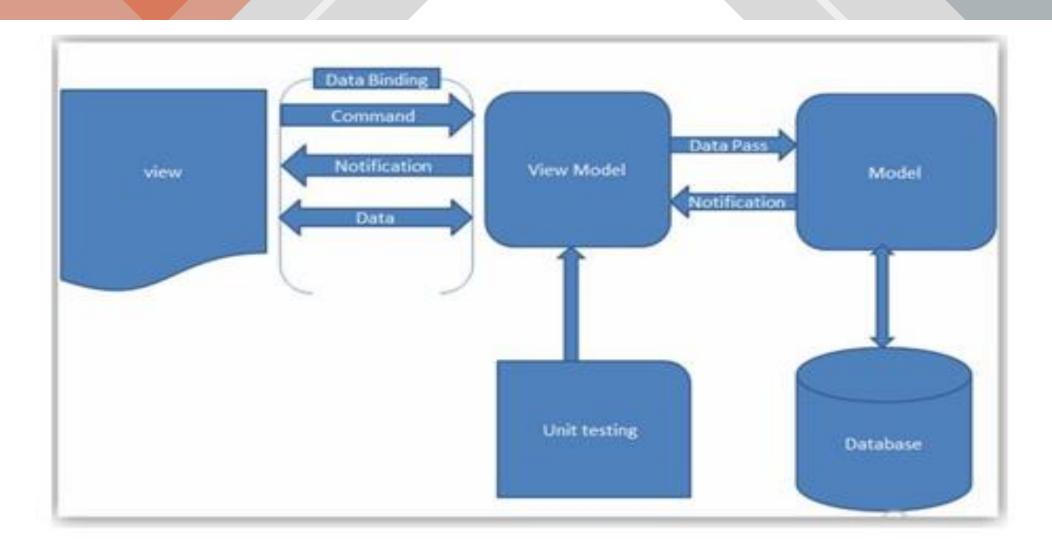

-Bugs Report

Integration Testing

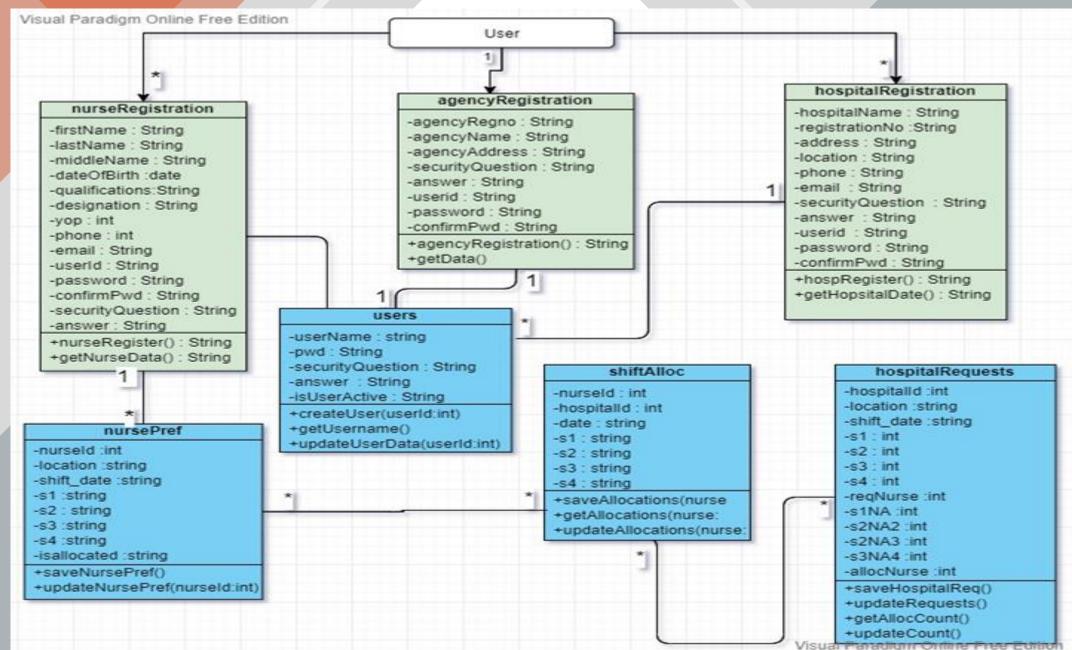

Regression Testing

## Agency

#### Select Date

#### Requests from hospital

Hospital ID	Request Date			Shift 3		Total Nurses Required	Allocated	Location
1	6/16/2021 12:00:00 AM	4	3	2	2	11	1	Laval

#### **Allocated Nurses**

Hospital ID	Shift Date				Shift4 Allocated	Total Allocated
1	6/16/2021 12:00:00 AM	0	0	1	0	1

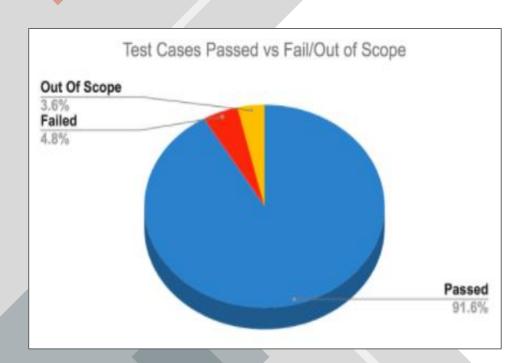

#### **Available Nurses**

#### **Test Summary Report**

#### 1. Metrics

- 1. No of test cases planned vs executed
- 2. No of Test cases Passed/Failed/Out of scope

Tests Planned	Tests Executed	Passed	Failed	Out Of Scope
86	83	79	4	3

1. No. of Defects with their priority and status

Status	High	Medium	Low	Total
Closed	1	1	0	2
Open	0	1	0	1

#### Allocation

#### **Nurse**

- Shift Allocation to the nurse is based on the availability and preferences provided.
- Example:
  - Monday : Shift 1
  - Tuesday: Shift 2
  - Wednesday: Shift 3
  - Thursday: Shift 4
  - o Friday: Shift 3
  - Saturday: Shift 2
  - O Sunday: Shift 1

#### **Allocation contd**

#### **Hospital**

- Hospital provides shift requests based on the requirement.
  - o Ex:
    - Shift 1:10
    - Shift 2:5
    - Shift 3:3
    - Shift 4:4

#### **Allocation Contd**

#### **Agency**

- Agency checks the number of open requests available in the system by selecting a date.
  - Ex: 5 July 2021.
- Agency user initiates the allocation, system checks the nurse's availability based on the hospital request.
- If no nurse available, the system updates the database as unallocated.

## **Allocation Algorithm**

Agency selects the date to initiate the allocation

**System retrieves hospital request and nurses available** 

#### **Check Total Requested Nurses <> Allocated Nurses**

Retrieve nurses from the system for the selected date, shift, and location.

Check count of available nurses by shift <= No. of nurses required in a shift from hospital request

If Yes	No			
Allocate and update the nurse status	Do nothing			
Increment the count of allocated nurses				
Update the Nurse status as allocated for the specific day.				
Notify the nurse and hospital				

## Thank you!
